

## Incident/Event Typing Table

Incident/Event Complexity	Characteristics
<b>Type 5</b>	<ul style="list-style-type: none"> <li>• The incident can be handled with one or two single resources with up to six personnel.</li> <li>• Command and General Staff positions (other than the Incident Commander) are not activated.</li> <li>• No written Incident Action Plan (IAP) is required.</li> <li>• The incident is contained within the first operational period and often within an hour to a few hours after resources arrive on scene.</li> </ul>
<b>Type 4</b>	<ul style="list-style-type: none"> <li>• Command staff and general staff functions are activated only if needed.</li> <li>• Several resources are required to mitigate the incident, including a Task Force or Strike Team.</li> <li>• The incident is usually limited to one operational period in the control phase.</li> <li>• The agency administrator may have briefings, and ensure the complexity analysis and delegations of authority are updated.</li> <li>• No written Incident Action Plan (IAP) is required but a documented operational briefing will be completed for all incoming resources.</li> <li>• The role of the agency administrator includes operational plans including objectives and priorities.</li> </ul>
<b>Type 3</b>	<ul style="list-style-type: none"> <li>• When capabilities exceed initial attack, the appropriate ICS positions should be added to match the complexity of the incident.</li> <li>• Some or all of the Command and General Staff positions may be activated, as well as Division/Group Supervisor and/or Unit Leader level positions.</li> <li>• A Type 3 Incident Management Team (IMT) or incident command organization manages initial action incidents with a significant number of resources, an extended attack incident until containment/control is achieved, or an expanding incident until transition to a Type 1 or 2 team.</li> <li>• The incident may extend into multiple operational periods.</li> <li>• A written IAP may be required for each operational period.</li> </ul>
<b>Type 2</b>	<ul style="list-style-type: none"> <li>• This type of incident extends beyond the capabilities for local control and is expected to go into multiple operational periods. A Type 2 incident may require the response of resources out of area, including regional and/or national resources, to effectively manage the operations, command, and general staffing.</li> <li>• Most or all of the Command and General Staff positions are filled.</li> <li>• A written IAP is required for each operational period.</li> <li>• Many of the functional units are needed and staffed.</li> <li>• Operations personnel normally do not exceed 200 per operational period and total incident personnel do not exceed 500 (guidelines only).</li> <li>• The agency administrator is responsible for the incident complexity analysis, agency administrator briefings, and the written delegation of authority.</li> </ul>
<b>Type 1</b>	<ul style="list-style-type: none"> <li>• This type of incident is the most complex, requiring national resources to safely and effectively manage and operate.</li> <li>• All Command and General Staff positions are activated.</li> <li>• Operations personnel often exceed 500 per operational period and total personnel will usually exceed 1,000.</li> <li>• Branches need to be established.</li> <li>• The agency administrator will have briefings, and ensure that the complexity analysis and delegation of authority are updated.</li> <li>• Use of resource advisors at the incident base is recommended.</li> <li>• There is a high impact on the local jurisdiction, requiring additional staff for office administrative and support functions.</li> </ul>
